

Advice and notice on Pigeons Vitality Schedules

With respect to grain and feeding – we recommend you to follow the recommendations given by your feed supplier – as the correct feeding is the «basic» for racing, moulting, breeding and for the rest period

It is our vision that the addition of the Pigeon Vitality natural products shall secure natural health, vitality, strength and endurance - all needed for optimum moulting, breeding and performance in the race season to win races in a sport becoming more and more professional and competitive.

All our products are described thoroughly on www.pigeonvitality.com and in our product brochures. The intention of this specific brochure is therefore not to go into detail, but to present our recommended schedules and some advices related to them.

First of all: Good health is the basis for all performances. Take particular care of canker and respiratory diseases in the racing season, as canker and virus affecting the respiratory organs are easily picked up in the basket under transport – particularly in the warm summer months. To reduce these problem for the racers, we strongly recommend our [Health and Performance Package](#).

Some product-specific notes:

Improver

The main and active components in Improver are organics acids, their salts and selected vitamins, which are easily dissolved in water. To make this products as a powder we have added Silicon dioxide (also known as silica)

as a dryer and flow improver. Silikon dioxide will adsorb water to its surface and keep the powder dry. This silica will be observed as a precipitation in the pigeons drinking water, because it is not water soluble. Silica is an inorganic mineral that is healthy for the pigeons , and in particular it keeps the feather strong an shining

AntiFungal

This product is only biological active if pH of the drinking water is less than 5. This is why we always recommend to give it together with Improver in correct dosages – as we then know that pH is < 5.

TriColi STOP Capsules

We have observed that some pigeons vomit when Tricoli STOP capsules has been administered. It will not harm the pigeons and it is not necessary to give it again if it vomits occurs more than 5 minutes after administration. It should not to be given to the breeders if the YB in the nest is younger than 3 weeks, as most of the capsules then will be feed to the youngsters wherby overdosage may occur.

We suggest to use TriColi STOP Capsules or powder (flock treatment) at least every second week in the racing season (in our test loft we give it every week and observe great performance and vitality).

We recommend to administer TriColi STOP on Tuesday or Wednesday evening if race is on Saturday

Turbo Flight

This products can be used only the pigeons stay one night in the basket, as the release of the pigeons should be less than 20 hours after the administration of the Turbo Flight. Else – seen from our field tests - the extra energy will be used for fighting in the basket (yes – even the hens will start fighting!)

If you do have any questions related to the Pigeon Vitality Natural products - we would be happy to respond and assist! Please send your inquiries to: mail@pigeonvitality.com.

Best regards

The Pigeon Vitality Team

Pigeon Vitality - Short Distance up to 300km (max 1 night in basket)

THE WEEK BETWEEN RACES	On Grain	In water	Capsule optioun
Return Day (e.g Saturday)	Omega-3 - ProGut	Belgamax, Rebuild powder and Amino-B complex*	Rebuild Capsules**
Second Day (e.g. Sunday)		Improver & AntiFungal***	
Third Day (e.g. Monday)		Improver & AntiFungal (morning) - pure water rest of day

**For pigeons returning late

*** From return day afternoon until morning third day

Pigeon Vitality - Race every weekend 500 km-750km (1 night in basket)

THE WEEK BETWEEN RACES	On Grain	In water	Capsule option
Return Day (e.g Saturday)		Belgamax, Rebuild powder and Amino-B complex*	Rebuild Capsules**
Second Day (e.g. Sunday)	Omega-3 & ProGut (afternoon)	Improver & AntiFungal***	
Third Day (e.g. Monday)		Improver & AntiFungal (morning) - pure water rest of day	
Fourth Day (e.g. Tuesday)	Omega 3 & MultiViTra (afternoon)		
Fifth Day (e.g. Wednesday)	Morning: Lecithin & L-Carnitine Afternoon:TriColi STOP Powder	Broncho Plus or Clearify	TriColi STOP
Sixth Day (e.g. Thursday)	Morning: Lecithin & L-Carnitine, Afternoon: Omega 3 & Oxy-B	Broncho Plus or Clearify	
Basketing Day (e.g Friday)		Broncho Plus or Clearify	
*Until afternoon - then change to Improver & AntiFungal			
**For pigeons returning late			
*** From returnday afternoon until morning third day			

Pigeon Vitality - 1 day Long Distance 500-750 km (2 nights in basket, race every 2nd week)			
WEEK 1 AFTER RACE (RECUPERATION)	On Grain	In water	Capsule option
Return Day (e.g. Saturday)	Amino-B Complex & ProGut	Belgamax, Rebuild powder and Amino-B complex*	Rebuild Capsules**
Second Day (e.g. Sunday)	Amino-B Complex & ProGut	Improver & AntiFungal***	
Third Day (e.g. Monday)		Improver & AntiFungal (morning) - pure water rest of day	
Fourth Day (e.g. Tuesday)	Omega 3 & MultiViTra		
Fifth Day (e.g. Wednesday)	Omega 3 & Oxy-B		
Sixth Day (e.g. Thursday)			
Seventh Day (e.g. Friday)			
WEEK 3 BEFORE RACE	On Grain	In water	Capsule option
"Return Day" (e.g. Saturday)			
Second Day (e.g. Sunday)		Improver & AntiFungal***	
Third Day (e.g. Monday)	Omega 3 & MultiViTra		
Fourth Day afternoon (e.g. Tuesday)	Omega-3 TriColi STOP Powder	Broncho Plus or Clarify	TriColi STOP
Fifth Day (e.g. Wednesday)	Lecithin, L-Carnithin Complex & Oxy-B	Broncho Plus or Clarify	
Basketing day (e.g. Thursday)	Lecithin & L-Carnithin Complex	Broncho Plus or Clarify	
*Until afternoon - then change to Improver , AntiFungal			
**For pigeons returning late			
*** From return day afternoon until morning third day			

Pigeon Vitality - Marathon Distance 750+ km (2+ nights in basket, race every 3rd week)			
WEEK 1 AFTER RACE (RECUPERATION)	On Grain	In water	Capsule optioun
Return Day (e.g Saturday)	Amino-B Complex & ProGut	Belgamax, Rebuild powder and Amino-B complex*	Rebuild Capsules**
Second Day (e.g. Sunday)	Amino-B Complex & ProGut	Improver & AntiFungal***	
Third Day (e.g. Monday)		Improver & AntiFungal (morning) - pure water rest of day	
Fourth Day (e.g. Tuesday)	Omega 3 & MultiViTra (afternoon)		
Fifth Day (e.g. Wednesday)	Omega 3 & Oxy-B (afternoon)		
Sixth Day (e.g. Thursday)			
Seventh Day (e.g Friday)			
WEEK 2 AFTER RACE (REST)	On Grain	In water	Capsule optioun
Return Day (e.g Saturday)			
Second Day (e.g. Sunday)			
Third Day (e.g. Monday)			
Fourth Day (e.g. Tuesday)	Omega 3 & MultiViTra (afternoon)		
Fifth Day (e.g. Wednesday)	Omega 3 & Oxy-B (afternoon)		
Sixth Day (e.g. Thursday)			
Seventh Day (e.g Friday)			
WEEK 3 BEFORE RACE	On Grain	In water	Capsule optioun
"Return Day" (e.g Saturday)			
Second Day (e.g. Sunday)		Improver & AntiFungal***	
Third Day (e.g. Monday)	Omega 3 & MultiViTra		
Fourth Day afternoon (e.g. Tuesday)	Lecithin & TriColi STOP Powder (afternoon)	Broncho Plus or Clarify	TriColi STOP
Fifth Day (e.g. Wednesday)	Lecithin, L-Carnithin Complex & Oxy-B	Broncho Plus or Clarify	
Basketing day (e.g. Thursday)	Lecithin & L-Carnithin Complex	Broncho Plus or Clarify

*** From return day afternoon until morning third day			

Pigeon Vitality Moulting Schedule

Pigeon Vitality - Moulting period		
WEEK*	On Grain	In water
Saturday	Omega-3 - Moulting and Breeding*	Amino-B Complex
Sunday	Omega-3 - ProGut, MultiViTra, Oxy-B*	Improver & AntiFungal
Monday	Omega-3 - Moulting and Breeding*	Improver & AntiFungal
Tuesday	*	Improver & AntiFungal
Wednesday	Omega-3 - ProGut, MultiViTra, Oxy-B*	Amino-B Complex
Thursday	Omega-3 - Moulting and Breeding*	
Friday	*	
*In the three most intensive moulting weeks we strongly advise to daily add Natural Dewormer. In addition to treat against worms - the high silicone content of Natural Dewormer secures strong and silky new feathers!		
Note: Amino-B complex can be given on the grain instead of Omega 3 two days in the week		

Pigeon Vitality Breeding Schedule

Pigeon Vitality - Breeding Schedule		
WEEK	On Grain	In water
Saturday	Omega-3 - Moulting and Breeding	Amino-B Complex
Sunday	Omega-3 - ProGut, MultiViTra, Oxy-B	Improver & AntiFungal
Monday	Omega-3 - Moulting and Breeding	Improver & AntiFungal
Tuesday		Improver & AntiFungal
Wednesday	Omega-3 - ProGut, MultiViTra, Oxy-B	Amino-B Complex
Thursday	Omega-3 - Moulting and Breeding	
Friday		

Note 2: Amino-B complex can be given on the grain instead of Omega 3 two days in the week

Pigeon Vitality Schedule for the resting season

Pigeon Vitality - Schedule for the resting season		
WEEK	On Grain	In water
Saturday		
Sunday	Omega-3 - ProGut, MultiViTra, Oxy-B	Improver & AntiFungal
Monday		Improver & AntiFungal
Tuesday		Improver & AntiFungal
Wednesday	Omega-3 - ProGut, MultiViTra, Oxy-B	
Thursday		
Friday		

Note: Amino-B complex can be given on the grain instead of Omega 3 the two days in the week
