THE PROVEN HEALTH PROGRAMME

Health & Performance Package

The products behind national and international winners – now in one package

1st International

Barcelona 2025
15,602 pigeons

1st–6th Open

SNFC Leicester
1,839 birds

+1.5 %

improvement per race with
BronchoPlus
statistically significant

Champions rely on Improver™ and AntiFungal™

Anthony Pellitteri, Belgium

1st International Barcelona 2025 (15,602 p) • 1st National Barcelona (5,819 p) • Winner Golden Wing 2025 • 5th National Narbonne (4,983 p)

Anthony started with Improver and AntiFungal in the middle of the 2024 season and saw *“excellent health in my colony and perfect condition”* for the rest of the year. In 2025 he basketed only two pigeons for the queen race – and won the 1st International against 15,602 pigeons over 998 km.

Jeff Mawbey, Canada – tested side by side Improver + AntiFungal vs. his usual routine

Jeff split his young birds into two groups. The half on Improver and AntiFungal had **fewer losses, brighter-looking birds and more prizes**. From the third year he put all his pigeons on both products.

Billy Bilsland, Scotland

1st, 2nd, 3rd, 4th, 5th & 6th Open SNFC YB Leicester

A historic result against 1,839 birds over 228 miles – achieved by one of the many top fanciers who have trusted Improver for years.

BronchoPlus™ – documented effect on race results

In 2019 our test loft (Jensen & Brakstad, Frederikshavn, Denmark) gave BronchoPlus on Monday and Tuesday before some race weekends, and other respiratory products before the rest. Results from the 10 middle-distance championship races:

+1.5 %

higher speed on average
(997 vs 982 points)

3.6 min

gained on a
4-hour race

$p \approx 0.02$

statistically significant
(also when adjusted for season
trend)

To our knowledge, BronchoPlus is the only pigeon product with a statistically significant improvement in race results documented in a field test. Points = speed of pigeon × 1000 / speed of race winner. Two-sample t-test, 4 vs 6 races; regression including week number gives the same conclusion.

The package contains

Improver™ 125 g – helps keep a healthy balance in the gut flora and supports quick recovery after races

TriColi-STOP™ powder – natural plant-based support for a healthy throat and crop

AntiFungal™ 125 g – used together with Improver in periods of stress and high humidity

2 × BronchoPlus™ – essential oils in the drinking water for free breathing during the season

Save 20% compared with buying the products separately

The weekly race-season programme – in short

- **Improver + AntiFungal** in the drinking water on the day the pigeons return from a race and the day after.
- **BronchoPlus** 2 ml per litre of water on Monday and Tuesday – the routine used in the field test.
- **TriColi-STOP** as directed on the label. Full schedule with dosages: scan the QR code below.
