Big Thank You to the Pigeon Vitality Team
(Esp their UK Agent Danny Henderson)

For the last 3 seasons we have been experimenting with their products, and in our 50 plus years history we have never put 4 seasons back to back as Good.

Will they make a you win? No
Will they make a bad pigeon good? No

Do they Aid top class pigeons, enabling them to hold form for longer and reach optimum Fitness levels? Yes

Our aim is always to push the boundaries of the birds fitness levels, recovery time and how many times they can successfully score week after week, these alongside a few other supplements are certainly helping us do so.

Like all sports science it's constantly evolving, stay ahead of the game.

#EveryPercentageCounts

Hi Frode, I have looked at my records, and the first week I used bronco plus I took the first 10 in the Federation, the 2 weeks later 1+2 fed only sent 13 birds, then 2 weeks after that 2 nd federation, 2 weeks later 2nd federation again and the same with the youngster another 3x1 federation when using bronco plus, I only used 2ml per litre, I am going to interview Peter Keogh tomorrow who was 1 st national this year , I asked him to check if he also used bronco plus before the nationals as he scored very well in all races, so I will find out tomorrow what races he used it on.👍
Regards
Danny

Peter Keogh has been using pigeon vitality products for the last 5 seasons and in that time he has won 133 national diplomas and in this year alone he has won 2019
1st National SNRPC Arras
3rd National SNRPC Troyes
8th National SNFC Roye
11th National SNFC Burdanne
11,14,27,36,51 National SNFC Ypres
14th National SNFC Reams
Also in the last 2 seasons he has won the SNRPC National averages 🐦🏆👍👏

Ps Frode he used bronco plus before he was 1st National Arras being 2 hrs in front of the next pigeon

BronchoPlus™

I started using BronchoPlus in the 2018 season where we had a hot summer. I chose this product because it is a natural product. To avoid having too much fluctuation in my results (which I have experience in other hot weather seasons), I chose this product to avoid respiratory illnesses. In the 2018 season, I chose to give 2ml / litre of drinking water Monday-Tuesday every 3rd weeks. The 2019 season I decided to give BronchoPlus every week during the racing season. I started by giving my pigeons 2 ml / litre drinking water for 6 days before the season started in late April. From week 20 until the season ended in week 32, my pigeons got it every week. I gave BronchoPlus Monday to Wednesday or Tuesday to Thursday afternoon 2ml / litre drinking water (basketing Thursday afternoon). I am really happy with this product as my pigeons in 2018 - 2019 have shown incredibly good condition with no problems with respiratory diseases.

Best regards
Jan Hasselstrøm, Dan 111
