

## **João Pedro Marques – National Champion Long Distance, Portugal 2021**

**2021**

In the supplementation we have used Pigeon Vitality products with huge success from day one, namely Improver and AntiFungal throughout the year and several times a week. We feel that the pigeons are always very healthy, and the use of antibiotics has been reduced to zero. Especially in the preparation of youngsters and in long distance, it is fantastic.

We give MultiViTra, also several times a week, which we consider a very complete and high-yield vitamin. On some days we use the oils (Omega-3 and Lecithin Oil) with ProGut (pro- and prebiotic) and the L-Carnitine-Magnesium-Calcium complex, which can be used for recovery or for race preparation. Recovery and preparation are very important. With long-distance races every 15 days, the PV products helped us not only to recover the pigeons very well, but also to start the preparation for the next race right away.

With PV products, success is just around the corner – try it yourself!
