

TriColi-STOP worked amazingly – Julia, Cologne

2026

It worked — with your tips, using water — and it worked amazingly!

I started with two of our bigger birds, who weren't doing so well — one of the males in particular was struggling to breathe, likely due to Trichomonads. The very next day, both of them looked at me like: 'What was that?! We're fit again!' His breathing was back to normal — before your capsule, he'd really been struggling.

What a wonderful, powerful thing you've invented. Thank you so much!

**All the best from Cologne,
Julia**
